Empower projects to take your business forward

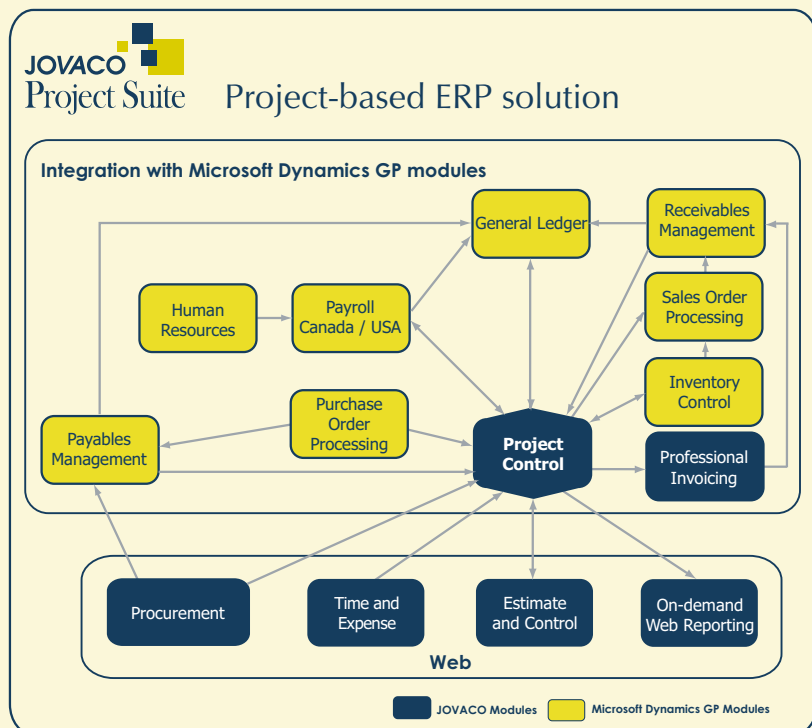

«Project Suite contributes to the success of each of our projects due to its flexibility (project structure adapted to the needs of our clients) and its accessibility regardless of location (time and expense entry by Internet and web reports). JOVACO is a partner who is attentive to the needs of its clientele and has a comprehensive understanding of our needs.»

*Daniel Tousignant, CGA,
Administrative Director, Solmers*

JOVACO's Project Suite, developed over the past twenty-five years, has become today's leading financial management system for project based companies. JOVACO, a Gold Certified Microsoft partner, has integrated Project Suite with the Microsoft Suite of products to deliver the best of both worlds: a complete ERP & Project Accounting solution.

- Specialized solutions for professional services
- Track projects by hours/cost/budget/revenue
- Flexible customer/project billing rules
- Real-time collaboration and planning
- Web based time and expense entry
- 10,000+ users

Over the past 25 years, JOVACO has continuously developed and enhanced its tools for Project Cost Control, Billing, Time & Expense entry, Estimating, Budgeting, Procurement, and all other key activities within project-based firms.

These tools are available within the JOVACO Project Suite, which features full integration to Microsoft Dynamics GP delivering the best of both worlds.

Manage all your activities by project

Project Control Center (PCC) incorporates all the functionalities to define and relate project concepts (projects, phases, budgets, resources, charge-out/cost rates utilization, etc...) to financial practices (general ledger, profit & loss, A/R, A/P, etc...)

- Automatically distribute inter-company and inter-departmental charges
- Extensive multi-currency project accounting functionality
- Multiple recognition methods: time & material, project progress, elapsed time, or specific periods
- Accurately measure work team productivity by determining the time allocated to complete projects, including hours billable to the client and different non-billable hours paid to employees
- Joint venture management

Way more than just a timesheet

Time & Expense (TEDI) entry from anywhere in the world, from any operating system (Windows, Linux, Unix, MacOs).

Beyond basic data capture, TEDI provides project management functions, simple or complex approval processes, resource planning and more.

- Assess project progress by phase, activity or resources
- Easily submit all multi-currency transactions on a single expense statement
- Resource planning by employee or class
- Distribute time, incurred expenses and internal fees
- Quickly establish different control levels to match company and project management rules

The corporate heart monitor

PORTAL SERVICES - Using Microsoft SharePoint Services, SQL Server and Reporting Services, JOVACO's portal provides reliable information access, a simple delivery mechanism and the ability to implement a collaborative environment that allows project teams to increase their effectiveness. The portal presents a dashboard view of multi-dimensional analysis in real time with key performance indicators.

- Extensive Web Service library
- Availability of key data without accessing the accounting system
- Dynamic site creation by project

Flexible to individual billing cases

PROFESSIONAL INVOICING - Its flexibility

makes it an ideal tool to meet the often diverse client billing requirements, while supporting your own contract terms (time & material, progress billing, cost-plus, etc...). Professional invoicing features:

- Bill projects in-whole or in-part, across multiple projects or across multiple companies.
- Define different invoice formats for each project or sub-project(phase)
- Establish an invoicing schedule for contract price invoicing
- Automate invoice creation
- Ability to present the amount budgeted, billed this month, billed to date and previously billed
